

Rótra®

- Ensures optimum feed distribution in the free-range and litter areas
- Improved litter quality by stimulating free-range behaviour
- Reduces stress by stimulating natural behaviour
- Provides a better spreading of birds in the house
- Reduces floor eggs
- Improves animal welfare
- Saves on labour

FlexBin

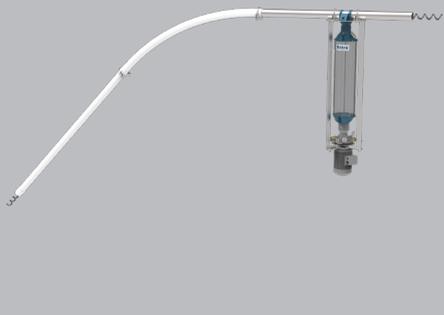

- FlexBin, synthetic storage funnel
- Available with single or double outlet
- Manually filling with feed or with Flex auger
- Various accessories, such as a cover, shielding grid, agitator and connection set

Synthetic underbin

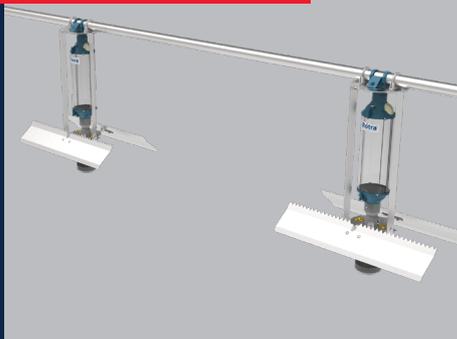

- Compact alternative for hopper, if there is no space for the hopper
- Available with single or double outlet
- Cover with a $\varnothing 100\text{mm}$ connector for a direct connection to the Flex auger
- Feed will be fed directly from the silo

Transport lines

- Transport lines are placed over the length of the house to transport the feed to the Rotra mini spin feeder
- Bends can be mounted
- 50 mm tube connection for mounting on the standard Rotra transport line (capacity 100 kg/hour)
- $\varnothing 60$ mm tube connection for mounting on a VDL600 tube feeding system or a Flex60 auger system (for higher capacity)

Mini spin feeders

- Mini spin feeder compact, 3.5 kg, with $\varnothing 50$ and $\varnothing 50$ mm tube connection
- Mini spin feeder long, 5.5 kg, with $\varnothing 50$ and $\varnothing 50$ mm tube connection
- Mini spin feeder aviary for multi-tier systems with separate 4.5 liter dispenser, $\varnothing 50\text{mm}$ drop tube to Rotra aviary spinner and $\varnothing 50\text{mm}$ tube connection
- Spreading angle adjuster if there is no space for a circular pattern, because of the laying nests
